

SkyReport is a 'standalone' application that works side by side with SkyLocator software. The application generates written reports as well as graphic (Map View) reports and reverse geocode* of the vehicle's positions.

Features:

- Easy to use Graphical User Interface (GUI)
- Create graphical (On-Map) reports and written reports with position details (reverse geocoding) like: nearest street, county, state, landmark, etc.
- You can filter all the data by type of event (Stops, Engine On, High Speed, etc).
- Animated playback function lets you view precise movements of your unit.

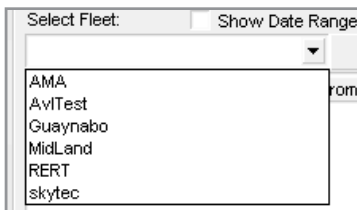

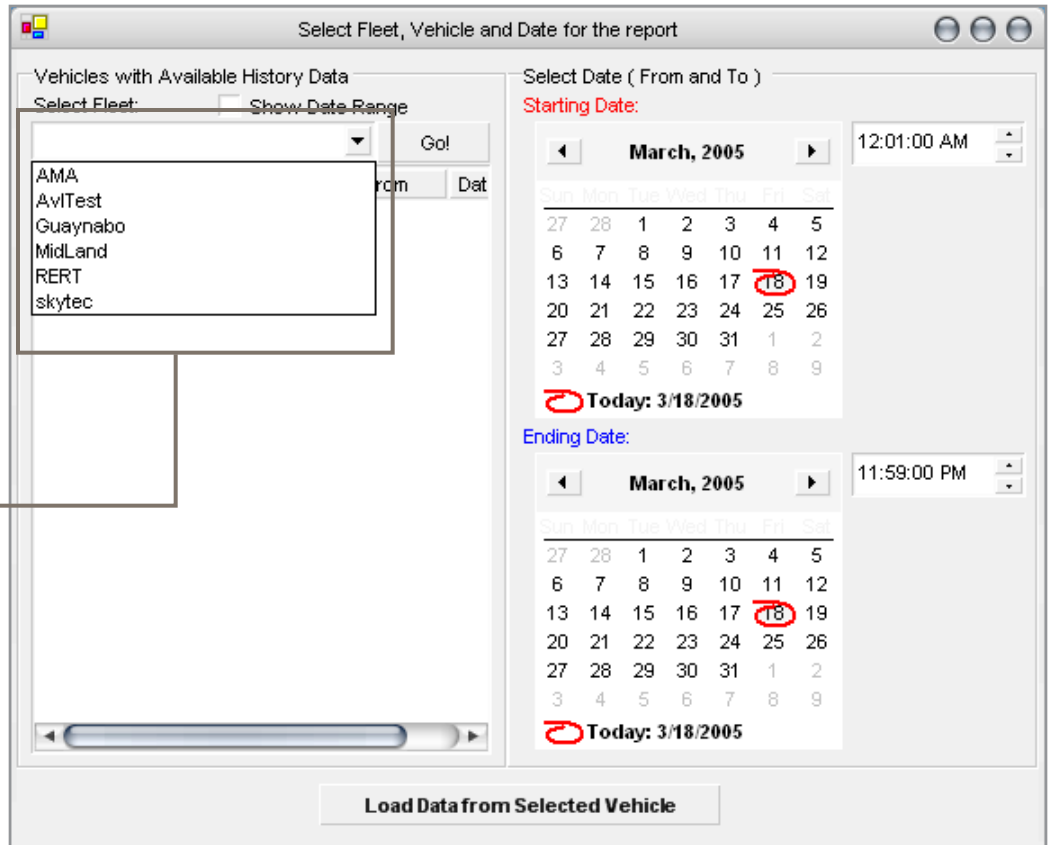

Four Easy Steps To View A Fully Detailed Report

Computer System Requirements

- Windows Me/NT/2000/XP (2000/XP Recommended)
- CPU: Pentium II 800MHz or better
- 280 MB of hard disk drive space / 256MB Ram (Minimum) / CD-Rom Drive / Mouse.
- SVGA Color Monitor or Better / 1024 x 768 or higher resolution (recommended).
- Single PC Use ONLY
- Package Contents: CD Rom Disk, Instruction Manual

Fleet Selection: First you must select your fleet.

Select Fleet, Vehicle and Date for the report

Vehicles with Available History Data

Select Fleet: skytec Show Date Range

Unit ID	OBC ID
1000	1720200022285010001000
1001	1720200022285010001001
